Import Data using Transform Maps (Spreadsheet)

Milestone 2 : Creation Of importset Table And Transform Map

Epic | Complexity: Medium | Duration: 40m

Description

Import Set Table

The **Import Set Table** is a temporary staging table used to store employee data uploaded from the spreadsheet. It contains fields such as **Employee ID, Name, Email, Department, and Location**. The imported data is stored in this table before it is validated and transformed into the final employee records.

Transform Map

The **Transform Map** defines how data from the Import Set Table should be transferred to the target Employee table. It maps fields such as **Employee ID, Name, Email, Department, and Location** from the imported data to the corresponding target fields. **Employee ID** can be used as the coalesce field to
